Khaled El-Basil	Zain El-Abdeen Sayed
Madiha Makhlof	Zakaria Salama

About Assiut

LOCATION

Assiut is the capital city of Assiut governorate in Upper Egypt. Assiut is the largest city in Upper Egypt and lies about 375 Kilometers south of Cairo.

HISTORY

Assiut could maintain its name throughout history. The name 'Assiut' had been originally derived from the Ancient Egyptian (Sa-oot), which means a guard who watches the borders between Upper Egypt and Lower Egypt.

The name remained unchanged until the Greco-Roman times where it was given the name Lycopolis (city of the wolf). Since ancient times, Assiut has been distinguished by its fertile land and rich resources.

CLIMATE

The province of Assiut, mostly a semi-desert territory, is hot in summer and cold in winter

All year long, the region is characterized by its clear skies, bright sun, and rare rains.

TRANSPORTATION

Due to its national importance, Assiut is linked with all cities and provinces of the Republic through a network of roads, water transportation, and railways. Trains and buses travel from and to Assiut almost every hour for 24 hours. There is also an international airport in Assiut where several Airlines and flights work on regular basis

TOURISM

There are several places of tourist attraction in Assiut Governorate. Of these important tourist sites are the ancient graves and tombs of Mir rock, Badari archaeological sites, Al Muharraq Monastery at al Qusia, the Monastery of Virgin Mary, and some ancient mosques and churches belonging to ancient times. Of relatively modern attraction are the Assiut barrages, Khan Khalili Factory, Al Azhar University, and Environmental Timber Fair.

In the town of Abu Teeg stands the twin Minaret mosque of El-Farghal, one of the most famous religious tourist attractions in Assiut Governorate. It was erected to honor Sheikh Mohammed Ahmed El-Farghal who was born in 810 AH. The mosque is located on a large space, 27 km south of the city of Assiut. Yearly, in a large procession, a celebration of the birthday of El-Farghal is held

**Hepato-Gastroenterology Unit, Internal Medicine Department
Assiut University**

Will Organize

Clinical Ultrasonography Basic Course

November 8-9, 2010

Assiut University Hospital

in collaboration with

ISCUS

International School for Clinical Ultrasonography

www.flyingfaculty.de

conducted by

*Lucas Greiner, MD | F.R.C.P., Alfred Bunk, MD
Hussein Okasha, MD and Nabil Elnahas, MD*

and
**International Workshop ON Therapeutic
GI Endoscopy**

November 9, 2010

Endoscopy Center, Assiut University Hospital

(Pre-Registration is Essential for Both Activities)

**For reservations and hotel accommodation
Kindly contact the official organizer of the congress**
