Dear Colleagues,

New techniques in endoscopy, advances in the prevention, diagnosis and treatment of digestive diseases are continually changing the field of gastroenterology. Staying abreast of these developments is critical to providing the best-quality care to your patients, or to advancing your research.

In view of this, we are pleased to invite you to attend the "5th annual international interventional endoscopy, Gastroenterology and Hepatology course" that will be held at Kasr Al Aini Hospital on February 23-25, 2008

The objectives of the course this year are to expand your knowledge of:

- Evidence-based indications for endoscopic procedures
- Comparison of the efficacy and safety of endoscopic approaches versus radiological and surgical alternatives
- The optimal endoscopic method for the individual case
- The choice and application of endoscopic instruments and accessories
- Understand the latest guidelines for searching and management for hepatocellular carcinoma
- Understand the latest guidelines for screening and management for hepatocellular carcinoma
- Recent advances in IBD & IBS
- Learn about cutting-edge developments in Hepatology, such as new developments in the treatment of alcoholic liver disease, HCV and acute liver failure
- Expand your knowledge of pancreaticobiliary disorders

In view of the positive feedback from the last meeting, the concept of the course will remain largely unchanged: Balanced mix of live-demonstrations, scientific discussions and presentations of recent research in endoscopy

Leading experts from Europe, USA, Japan, Arabic countries as well as Egypt will perform State Of The Art procedures during the workshop. These will be transmitted live from the endoscopy unit. At the general medicine department
